OPERATIONS OUTSIDE THE CONTINENTAL

PART 42—NONSCHEDULED AIR CARRIER CER-

PART 61—SCHEDULED AIR CARRIER RULES

FIRE PREVENTION IN AIR CARRIER AIRCRAFT

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 10th day of January 1947.

It appearing that: Amendments to §§ 41.20, 42.10 and 61.30 (11 F. R. 11353) of the Civil Air Regulations effective November 1, 1946, require extensive modification of the aircraft involved; the starting and completion dates specified in these amendments were established on the best information available when said amendments were promulgated; the time required to make the design changes and tests and the inability of the manufacturers to furnish the necessary parts and materials make it impossible for the carriers to accomplish the modifications required in compliance with the dates now specified; additional time should be granted to make such modifications, compliance with the procedures required by section 4 (a) of the Administrative Procedure Act is unnecessary.

Now, therefore: Effective January 10, 1947, §§ 41.20 (f) (2), 42.10 (b) and 61.30 (b) are amended by substituting "May 1, 1947," for "January 1, 1947," and substituting "May 1, 1948," for "January 1, 1948;" §§ 41.20 (f) (3), 42.10 (c) and 61.30 (c) are amended by substituting the date "May 1, 1947," for "January 1, 1947," and by substituting the date "May 1, 1948," for the date "September 1, 1947."

Supp., 2.109) under section 505 (a) of the act is amended to read as follows:

§ 2.109 *New drugs; exemption from section 505 of the act.* A new drug shall not be deemed to be subject to section 505 of the act if it is a drug which is licensed under the Public Health Service Act of July 1, 1944 (58 Stat. 682; 42 U. Chapter XI—Office of Temporary Controls, Office of Price Administration

PART 1407—RATIONING OF FOOD AND FOOD PRODUCTS

[3d Rev. RO 3, 1st Amdt. 33]

SUGAR

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.

Third Revised Ration Order 3 is amended in the following respects:

1. Section 2.3 (d) is amended to read as follows:

(d) *How application is made.* An industrial user's application for the increase allowed by this section must be made, in person or by mail, to the Sugar Branch Office with which he is registered. The first application for such increase must be made on OPA Form R-357 (Revised). No further application for such increase need be filed unless one or more areas to which an industrial user delivered products in 1941 are added to the areas listed in the supplement to this order. Each time one or more listed areas are added by an amendment, he must apply on OPA Form R-357 (Revised) for the increase in allotment to which he may be entitled because of the addition of such areas for the first period to which the amendment applies.

2. Section 2.3 (g) is amended by adding a parenthetical phrase to read as follows: (If during any period an industrial user ceases to make to any listed area for which he obtained an increase the deliveries required by this paragraph, he must report such fact to the Sugar Branch Office on his next application for an allotment and the amount of the increase he was granted for such delivery shall be considered excess inventory as provided in section 2.8 of this order.)

This amendment shall become effective January 25, 1947.

NOTE: The reporting and record-keeping requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 20th day of January 1947.

PHILIP B. FLEMING,
Temporary Controls Administrator.

¹ 11 F. R. 116.

Rationale Accompanying Amendment No. 33 to Third Revised Ration Order 3

Present regulations. Present regulations require industrial users to file Form R-357 (Industrial User Application for Increased Allotment Based on Population Increases) for each allotment period in which the factor for that county has changed from the preceding allotment period, or when additional counties are added to the list of counties receiving increase factors.

Proposed amendment. This amendment eliminates the requirement of filing an R-357 Form when a change in factors takes place but continues the requirement of filing R-357 when a county or counties are added to the list as shown in section 4 of Supplement 1 to Third Revised Ration Order 3.

This amendment also specifically provides that if during any period an industrial user ceases to make deliveries to any county for which he was granted an increase he must report such fact to the Sugar Branch Office when he files his next application for an allotment.

Reason for change. Since the Office of Temporary Controls, Office of Price Administration, already has all necessary data with respect to the counties in which an increased factor was granted in the preceding period, the filing of this data when the factor is changed merely represents an unnecessary duplication of effort by the user and the Office of Temporary Controls. However, a report is needed when a county is added to the list, because the previous report from the user did not cover this county. Since an industrial user may use an increase granted under the provisions of section 2.3 only in products to be delivered by him to the area for which he received the increase, a user who ceases to make such deliveries must report such fact to the Sugar Branch Office.

PART 1407—RATIONING OF FOOD AND FOOD PRODUCTS

[3d Rev. RO 3, 1st Amdt. 34]

SUGAR

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.

Third Revised Ration Order 3 is amended to read as follows:

1. Section 24.2 (a) (2) is amended to read as follows:

(2) The sum of his sugar use in each corresponding calendar month in 1944 and 1945 is divided by two and the result is multiplied by 90 percent;

2. Section 24.2 (b) (3) is amended to read as follows:

(3) The base for each calendar month, if such month is after August, is com-

¹ 11 F. R. 177, 14281.

puted by multiplying the sugar use for the corresponding calendar month in 1945 by 80 percent;

3. Section 24.2 (c) (1) is amended to read as follows:

(1) The base for each calendar month from September through December will be computed by multiplying the sugar use for the corresponding calendar month in 1945 by 80 percent;

This amendment shall become effective as of January 1, 1947.

Issued this 20th day of January 1947.

PHILIP B. FLEMING,
Temporary Controls Administrator.

Rationale Accompanying Amendment No. 34 to Third Revised Ration Order 3

The purpose of using percentage factors in establishing maximum allowances under the provisions of Amendment 24 was in order to relate allowances of sugar for the manufacture of bulk sweetened condensed milk to a representative rationing period. That is, by the use of percentage factors in establishing maximum allowances, the annual use of sugar for the manufacture of bulk sweetened condensed milk will approximate the average use of sugar for such purpose during the years 1943, 1944 and 1945. However, at the time Amendment 24 was issued, estimated data were used in establishing the percentage factors. Re-examination of these percentage factors on the basis of actual rather than estimated figures indicate that the percentage factors for the year 1945 and for the years 1944 and 1945 must be revised. The revised percentage factors for the year 1945 and for the years 1944 and 1945 are incorporated in this amendment.

August 7, 1946, Public Law 657, 79th Congress (hereinafter referred to as the "act"), and Executive Order No. 9786 dated October 5, 1946 (hereinafter referred to as the "Executive order"), the following regulations are prescribed to govern the filing, consideration, adjustment and settlement of claims for relief by contractors against the Department of the Navy under the provisions of the act and the Executive order.

§ 29.1 *Filing of claims.* (a) Where a claim shall be filed with the Navy Department under the provisions of the Executive order, it shall be filed with the bureau or activity under whose contracts and subcontracts the loss is claimed. When the claim is made with respect to contracts and subcontracts of more than one bureau or activity, the claim shall be filed with the bureau or activity under whose contracts and subcontracts the largest claim for loss is made.

(b) Since no claim shall be received or considered by any war agency unless properly filed in accordance with the provisions of the act and the Executive order on or before February 7, 1947, the date on which a claim or an amendment to a claim is filed with a bureau or office shall be immediately noted or stamped on the four copies of the claim.

LICENSES; PROCEDURE

§ 22.2 *Applications.* To obtain a license for any establishment, biologic product or trivalent organic arsenical, the manufacturer shall make application to the Surgeon General on forms prescribed for such purpose, and in the case of an application for a product license shall submit samples of the product and specimens of the labels, enclosures, and containers proposed to be used for such product.

§ 22.3 *Inspection of establishments and examination of products prior to licensing.* Licenses shall be issued only after inspection of the establishment and examination of the product for which a product license is desired and upon a determination that the establishment and the product meet the standards prescribed in the regulations in this part. Additional product licenses shall be issued only upon examination of the product and a determination that the product meets the standards prescribed in the regulations in this part.

§ 22.4 *Form of license: domestic establishments.* The following form of license is prescribed for establishments located in any State or possession of the United States:

Establishment License No. _____

This is to certify that _____ of _____, through the establishment identified as _____ located at _____ is hereby licensed, pursuant to section 351 of the Public Health Service Act, approved July 1, 1944 (58 Stat. 682), and regulations thereunder, to propagate or manufacture, and to prepare for sale in the District of Columbia, or for sending, bringing or carrying from any State or possession into any other State or possession or into any foreign country any virus, serum, toxin, antitoxin, or analogous product, or arspenamine or its derivatives (or any other trivalent organic arsenic compound) for the propagation and manufacture of which the establishment holds an unsuspended and unrevoked license issued by the Federal Security Administrator pursuant to said act and regulations.

Federal Security Administrator.
Date _____

§ 22.5 *Product licenses.* Each product license shall designate:

- The manufacturer.
- The establishment.
- The license number of the establishment.

(d) The proper name of the product, with additional specifications, if any, which may be approved or required for additional labeling purposes.

§ 22.6 *Changes to be reported.* Important changes in location, equipment, management and responsible personnel, or in production methods and labeling of any licensed product or of any product for which an application for a license is pending shall be immediately reported to the Institute by any establishment holding a license, and, unless in case of an emergency, not less than 30 days in advance of the time such changes are made; failure to make such report shall constitute a ground for summary suspension of a license pending reinspec-

tion of the establishment or re-examination of the product.

§ 22.7 *Products under development.* A biologic product or trivalent organic arsenical undergoing development, but not yet ready for a product license, may be shipped or otherwise delivered from one State or possession into another State or possession, for purposes of controlled investigation, only in accordance with regulations under section 505 (i) of the Federal Food, Drug, and Cosmetic Act, as amended.

§ 22.8 *Issuance, revocation or suspension.* A license shall be issued by the Administrator upon the recommendation of the Surgeon General and upon the finding by the Surgeon General that the establishment or the product, as the case may be, meets the standards established by the regulations in this part as herein prescribed or hereafter amended. Licenses shall be valid until suspended or revoked. An establishment or product license shall be revoked upon application of the manufacturer giving notice of intention to discontinue the manufacture of all products or of intention to discontinue the manufacture of a particular product for which a license is held. The Surgeon General shall recommend to the Administrator that a license be suspended or revoked whenever he finds, after notice and opportunity for hearing, that the establishment or the product for which the license has been issued fails to conform to the standards in the regulations in this part as herein prescribed or hereafter amended to insure the continued safety, purity and potency of the manufactured product. In case of suspension, if the faulty condition is not corrected within 60 days or within such other period as may be specified in the notice of suspension, he shall recommend that the license be revoked. Except as provided in § 22.10, prior to the institution of proceedings looking to the suspension or revocation of a license the licensee shall be advised in writing of the facts or conduct which may warrant such action and shall be accorded opportunity within a reasonable period prescribed by the Surgeon General to demonstrate or achieve compliance with the regulations in this part.

§ 22.9 *Licenses heretofore issued.* Any license heretofore issued and in effect upon the effective date of the regulations in this part shall remain in effect unless and until superseded by a new license, or suspended or revoked, pursuant to the regulations in this part.

§ 22.10 *Summary suspension.* Whenever the Surgeon General has reasonable ground to believe that an establishment or product for which a license has been issued fails to conform to the standards prescribed in the regulations in this part, and that by reason of such failure and of failure of the manufacturer to take prompt corrective measures on notice thereof, the distribution or sale of a licensed product would constitute a danger to health, or that the establishment and production methods have been so changed as to require in order to protect the public health a new showing that the

establishment or product meets the standards prescribed in the regulations in this part, he may recommend to the Administrator that the license for the establishment or the product be summarily suspended and the manufacturer be required (a) to notify the selling agents and distributors to whom such product or products have been delivered of such suspension, (b) to furnish complete records of such deliveries and notice of suspension, and (c) to show cause within 60 days or such other period as may be specified in the order why the license should not be revoked.

§ 22.11 *Review Board.* When deemed advisable by the Surgeon General, in matters involving the safety, purity and potency of licensed products or products for which an application for license is pending, the reports of inspection and laboratory examinations, together with any pertinent data the establishment may submit, shall be passed upon by a special board of three officers appointed by the Surgeon General for that purpose. The board shall report its findings to the Surgeon General who will forward its report, together with his findings and recommendations, to the Administrator.

§ 22.12 *Opportunity for hearing.* Any manufacturer whose application for a license has been denied, or whose establishment or product license has been summarily suspended, without prior opportunity for hearing, may appeal from such denial or suspension and shall be entitled to a hearing thereon before a review body constituted as provided in § 22.11. The Surgeon General, upon review of the record, may affirm, reverse, or modify the findings of the review board, or may direct the taking of further testimony, and shall forward his determinations and recommendations to the Administrator.

§ 22.13 *Suspension and revocation: publication.* Notice of suspension or revocation of license, with statement of cause therefor, may be published by the Administrator.

§ 22.14 *Reissuance.* An establishment license, previously revoked or suspended may be reissued or reinstated upon inspection of the establishment, or upon examination of the product showing that the reasons for revocation or suspension have been corrected, except that in case of a product license revoked upon application or because of failure to meet changes in standards prescribed by amendment to the regulations in this part after the issuance of such license, only such inspection and examination as may be considered advisable by the Institute shall be required.

FOREIGN ESTABLISHMENTS AND PRODUCTS

§ 22.20 *Licenses required; products for controlled investigation only.* Any biologic or trivalent organic arsenical propagated or manufactured and prepared in any foreign country and intended for sale, barter or exchange shall be refused entry by collectors of customs unless produced in an establishment holding an unsuspended and unrevoked establishment license and license for the

product. Unlicensed products intended solely for purposes of controlled investigation are admissible only if in accord with applicable regulations under section 505 (i) of the Federal Food, Drug, and Cosmetic Act, as amended.

§ 22.21 *Procedure.* Except as otherwise provided in this part, licenses for foreign establishments and products shall be issued, suspended or revoked in the same manner as licenses for domestic establishments and products. Each foreign establishment holding a license and consigning any licensed biologic product or trivalent organic arsenical into any State or possession shall be required to file with the Surgeon General the name and address of any representative or representatives authorized by the establishment to distribute the product, and such representative or representatives shall keep such records of such distribution as are required of domestic licensed establishments, and failure to maintain such records shall constitute ground for revocation of license.

§ 22.22 *Form of license.* Licenses for establishments located in foreign countries shall be in form similar to that for domestic establishments except that they shall authorize preparation for sending, carrying, or bringing for sale, barter or exchange from the foreign country designated in the license into any State or possession of the United States and shall specify that it is issued upon the condition that the licensee will permit the inspection during all reasonable hours of the establishment by any officer, agent, or employee of the Federal Security Agency authorized by the Federal Security Administrator for such purpose.

§ 22.23 *Smallpox vaccine; importation prohibited.* The importation of smallpox vaccine into any State or possession from any foreign country is prohibited except that smallpox vaccine may be sent from any foreign country, in containers indicating plainly the limited purpose intended, to the Institute for test or research purposes or for vaccine production. § 22.24 *Samples to accompany each importation.* Each foreign importation of a biologic product or trivalent organic arsenical from a licensed establishment, whether or not intended for investigational use only, shall be accompanied by at least two final containers of each lot of any biologic product and by at least 15 final containers of each lot of any trivalent organic arsenical contained in the shipment. Such samples shall be forwarded by the collector of customs at the port of entry to the Institute for examination. If separate samples are not found accompanying the shipment, samples shall be obtained from the shipment by the collector of customs and forwarded to the Institute. (Sec. 801, 52 Stat. 1058; 21 U. S. C. 381)

ESTABLISHMENT INSPECTION

§ 22.30 *Inspectors.* Inspections shall be made by an officer of the Public Health Service having special knowledge of the methods used in the production and con-

trol of biologic products and designated for such purpose by the Surgeon General or by any officer, agent, or employee of the Federal Security Agency specifically designated for such purpose by the Administrator.

§ 22.31 *Time of inspection.* The inspection of an establishment for which a license is pending need not be made until the establishment is in operation and is manufacturing the complete product for which a product license is desired. In case the license is denied following inspection for the original license, no reinspection need be made until assurance has been received that the faulty conditions which were the basis of the denial have been corrected. An inspection of each licensed establishment shall be made at least once each year. Inspections may be made with or without notice, and shall be made during regular business hours unless otherwise directed.

22.32 *Duties of inspector.* The inspector shall:

(a) Call upon the active head of the establishment, stating the object of his visit,

(b) Interrogate the proprietor or other personnel of the establishment as he may deem necessary,

(c) Examine the details of location, construction, equipment and maintenance, including stables, barns, warehouses, production laboratories, bleeding clinics maintained for the collection of human blood, shipping rooms, record rooms, and any other structure or appliance used in any part of the propagation, manufacture, and preparation of a product,

(d) Investigate as fully as he deems necessary the methods of propagation, processing, testing, storing, dispensing, recording, or other details of manufacture and distribution of each licensed product, or product for which a license has been requested, including observation of these processes in actual operation,

(e) Obtain and cause to be sent to the Institute adequate samples for the examination of any product or ingredient used in its preparation,

(f) Bring to the attention of the manufacturer any fault observed in the course of inspection in location, construction, production methods, or administration of a licensed establishment which might lead to impairment of a product,

(g) Inspect and copy, as circumstances may require, any records required to be kept pursuant to § 23.36,

(h) Certify as to the condition of the establishment and of the production methods followed and make recommendations as to action deemed appropriate with respect to any application for license or any license previously issued.

ESTABLISHMENT STANDARDS

§ 22.35 *Responsible head.* A responsible person shall be in permanent and full control of the establishment in all matters relating to the manufacture of products. A responsible person is one who has been trained in the manufacturing techniques employed and the fundamental scientific facts upon which the manufacture of products rests, who is capable of enforcing discipline among

the employees under his supervision, and to whom sufficient authority has been delegated for such purpose.

§ 22.36 Records, samples, cultures—

(a) *Production and distribution records.* Records shall be kept, with dates, of the various steps in the manufacture, testing, disposition, and distribution of each lot, so that at any time these steps as regards any lot number may be traced by an inspector. The records shall be retained, for such interval beyond the expiration date as is considered necessary for the individual product to permit the return of any clinical report of unfavorable reactions. This interval will vary with the type of product and its geographic distribution. A minimum of 6 months after the expiration date with 5 years as the extreme interval under all circumstances is considered adequate. Records of distribution of each lot shall in any event be kept as long as the lot remains the property of the licensed manufacturer.

(b) *Records of recall.* Complete records shall be maintained pertaining to the recall from distribution of any product upon notification from the Institute of failure to conform with the standards prescribed in the regulations in this part, deterioration of the product or any other factor by reason of which the distribution of the product would constitute a danger to health.

(c) *Sterilization records.* Records including the date, duration, and temperature of each sterilization shall be made by means of automatic registering devices or under a system of recording which gives reasonable assurance of the accuracy and reliability of the record.

(d) *Animal necropsy records.* A necropsy record shall be kept on each animal from which a biologic product has been obtained and which dies or is killed because of disease while employed in production of a product.

(e) *Retention of reference samples.* Reference samples from each lot shall be retained by the manufacturer until the entire lot has become outdated and for 6 months thereafter. Exceptions may be authorized by the Institute when the lot yields relatively few final containers and when such lots are prepared by the same method in large numbers and in close succession.

(f) *Cultures.* Cultures and other materials while used in the production of licensed products shall be labeled and preserved in a safe and orderly manner.

(g) *Records in case of divided manufacturing responsibility.* If two or more establishments participate in the manufacture of a product, the records of both establishments must show plainly the degree of responsibility of each in the manufacturing process.

§ 22.37 Physical establishment; construction, equipment and care—(a) *Work with spore-bearing organisms.* All work with spore-bearing micro-organisms shall be carried out in (1) an entirely separate building with its own entrance, or (2) a portion of a building used for the manufacture of other products constructed in such a manner as to be completely walled-off so that admission to the special unit may be gained

only through an entrance independent of the remainder of the building. All containers used shall be permanently marked so as to avoid the possibility of contamination of products.

(b) *Work of a diagnostic nature.* Laboratory procedures of a clinical diagnostic nature involving possibly contaminated materials shall be in space set apart from that used for the production of licensed products, except that production space which is used only occasionally may be used for diagnostic work provided spore-bearing pathogenic micro-organisms are not involved and provided the space is thoroughly cleaned before production is resumed.

(c) *Laboratory and bleeding rooms.* Laboratory rooms for the production of licensed products, including the bleeding rooms and other places where cleanliness is essential, shall be efficiently screened and kept free of flies and other insects or vermin. Building construction shall be such as to insure freedom from dust, smoke and deleterious or obnoxious odors in the laboratory and bleeding rooms and such as to permit thorough cleaning and, when necessary, chemical disinfection of bleeding rooms and rooms for smallpox vaccine animals.

(d) *Stables.* Stables shall be well lighted and well ventilated, and the floors shall be so constructed and cared for as to insure cleanliness.

(e) *Sterilization.* Sterilization equipment and methods used shall be such as to insure the complete destruction of contaminating, living organisms, including living spores. The containers, filling apparatus, and other pieces of apparatus or materials which may come in contact with biologic products during manufacture shall be scrupulously clean. Such equipment shall be absolutely sterile unless the product is protected by subsequent sterilizing treatment.

(f) *Containers used in production.* All containers used in preparation of biologic products shall be of such construction as will readily permit inspection for cleanliness.

(g) *Hot water available.* Hot water shall be provided in bleeding rooms and stables for smallpox vaccine animals.

(h) *Disposal of manure.* No manure shall be so stored as to permit the breeding of flies on the premises nor shall the establishment be located in close proximity to off-property manure storage capable of engendering fly breeding.

(i) *Isolation of hog cholera production.* All personnel, animals and equipment used in the production of hog cholera serum shall be kept entirely separate from personnel, animals, and materials used in the production of biologic products for human use.

§ 22.38 Animals used in production—

(a) *Quarantine and care.* Animals used in production of biologic products shall be kept under competent daily inspection and preliminary quarantine for a period of at least 7 days before use. Only healthy animals free from communicable disease shall be used for production purposes and at all times shall be adequately housed, fed, and humanely treated. Particular care shall be taken during the quarantine period to eliminate those animals of the equine genus

which may be infected with glanders, and those of the bovine genus which may be infected with tuberculosis.

(b) *Immunization against tetanus.* All horses used in the production of biologic products, except those which are under active immunization for the production of tetanus antitoxin, shall receive injections of tetanus toxoid in such amounts and at such intervals as experience has shown adequate to insure immunity to tetanus.

(c) *Disposal of used animals.* No animal used for production or testing of products shall be removed from the premises while it is capable of transmitting disease. An animal which is unsuitable because of its physical condition for the production or testing of a product shall not be removed from the premises alive except for the purpose of being utilized for animal by-products. No animal shall be allowed to continue to live unnecessarily when to do so would be an inhumane act.

(d) *Reporting of certain diseases required.* In case of actual or suspected infection with foot and mouth disease, glanders, tetanus, anthrax, gas gangrene, equine infectious anemia, or equine encephalomyelitis among animals intended for use or used for the production of biologic products, the manufacturer shall immediately notify the Institute.

(e) *Smallpox vaccine production animals.* Animals used for propagation of smallpox vaccine shall be thoroughly cleaned with soap and water at the beginning of the quarantine and at its conclusion. No area of the animal shall be vaccinated which is liable to be contaminated by feces.

(f) *Treatment of vaccinated animals.* Preliminary to taking smallpox vaccine material from vaccinated animals, such animals shall be killed or rendered insensible to pain.

(g) *Restriction on attendants.* Personnel while caring for smallpox vaccine animals shall be excluded from horse stables and paddocks and from contact with horses.

§ 22.39 Human blood donors. Only those persons may serve as a source of the whole blood for use in preparing a licensed product whose physical condition is such that the withdrawal of the desired amount of blood will not endanger their health and who are certified by a qualified doctor of medicine as being free of disease transmissible by blood transfusion as far as can be determined from the donor's personal history, from physical examination and such clinical tests as appear necessary for each donor on the day upon which the blood is withdrawn from the donor, except that this requirement may be modified by the Institute if the licensed product is processed by a method which insures the destruction or complete removal of the causative agent of such disease.

STANDARDS FOR PRODUCTS: LABELS

§ 22.50 Container labels. The following items shall appear on the label affixed to each container of a product capable of bearing a full label:

- (a) The proper name of the product;
- (b) Name, address, and license number of manufacturer;

(c) Lot number;

(d) The expiration date.

If the final container is capable of bearing only a partial label, the final container shall show as a minimum the name (expressed either as the proper or common name), the lot number, and the name of the manufacturer and, if the final container is incapable of bearing any label, the items shall appear only on the outside label.

If the final container is a multiple dose container, the container label must indicate the recommended dose. When the label has been affixed to the container a sufficient area of the container must remain uncovered for its full length or circumference to permit inspection of the contents.

§ 22.51 *Proper name on outside label.* The proper name in the form designated in the product license for such purpose must appear upon the outside label in legible type and shall be given precedence in position and prominence over any trade-mark or trade name used:

(a) The "outside label" is the label of the carton enclosing one or more final containers, except that if no such carton is used the label of the individual final container is regarded as the outside label.

(b) "Legible type" includes only type of a size and character which can be read with ease when held in a good light and with normal vision.

(c) "Precedence in position" of the proper name will have been observed if it is placed above any trade-mark or trade name and provided it is symmetrically arranged with respect to other printing on the label.

(d) "Precedence in prominence" of the proper name will have been observed if the style of type is of the same or greater point size and of equal face, or heavier, than that used in printing the trade-mark or trade name, and if the contrast in color value between the proper name and the background is not less than that between the trade-mark or trade name and the background.

§ 22.52 *Outside label; additional items.* The label affixed to the outside carton shall include, in addition to the proper name and the items required on the label of the final container, the following:

(a) The preservative used and its concentration,

(b) The volume of the contents, if a liquid, or the weight, if a solid, and the potency or dosage if more than one strength is dispensed,

(c) The recommended storage temperature,

(d) The words "Shake Well," or equivalent, when indicated by the character of the product,

(e) The dose and route of administration recommended or reference to such directions in an enclosed circular,

(f) The source of the product when a factor in safe administration,

(g) Minimum potency of product expressed in terms of official standard of potency or, if potency is a factor and no standard of potency has been prescribed, the words "No U. S. standard of potency."

§ 22.53 *Divided manufacturing responsibility to be shown.* If two or more establishments participate in the manufacturing process, the name, address, and license number of each must appear on the label of the final container, if capable of bearing a full label, and on the outside label.

§ 22.54 *Name of selling agent or distributor.* The name and address of the selling agent or distributor of a product may appear on the label under the designation of "selling agent" or "distributor" provided that the name and address of the manufacturer is given precedence in prominence.

§ 22.55 *Products for export.* Labels on packages or containers of products for export may be adapted to meet specific requirements of the regulations of the country to which the product is to be exported provided that in all such cases the minimum label requirements prescribed in § 22.50 are observed.

STANDARDS FOR PRODUCTS: GENERAL

§ 22.70 *Tests prior to release.—(a) Required for each lot.* No lot of any licensed product shall be released by the manufacturer prior to the completion of tests for conformity with the standards applicable to such product.

(b) *Potency.* Tests for potency shall be made on each lot only after completion of those processes of manufacture which may affect the potency of the final product.

(c) *Identity and safety.* The contents of a final container of each filling of each lot shall be tested for identity, if such a test is available, and for safety either after the labels have been affixed to the final container or affixed, both outside and inside, to the multiple container storage receptacle just prior to its sealing for storage purposes, except that exceptions to this procedure may be authorized by the Institute to apply when the volume of the final container is very large and when more than one lot is processed each day.

(d) *Sterility.* Samples from final containers selected at random after each filling from each lot of products shall be tested for sterility.

§ 22.71 *Tests: by whom made.* Tests for safety, purity and potency applicable to the product shall be completed for each lot of any licensed product prior to its release by the manufacturer, and samples of any lot of any licensed product may at any time be required to be sent to the Institute for examination.

§ 22.72 *Ingredients, preservatives, diluents.* All ingredients used in a licensed product, and any diluent provided as an aid in the administration of the product shall meet generally accepted standards of purity and quality. Any preservative used shall be sufficiently non-toxic so that the amount present in the recommended dose of the product will not be toxic to the recipient, and in the combination used shall not denature the specific substances in the product below the minimum acceptable potency within the dating period when stored at the recommended temperature.

§ 22.73 *Total solids in serums.* Except as otherwise provided by regulation, no liquid serum or antitoxin shall contain more than 20 percent total solids.

§ 22.74 *Permissible combinations.* Licensed products may not be combined with other licensed products, either therapeutic, prophylactic or diagnostic, except as a license is obtained for the combined product. Licensed products may not be combined with nonlicensable therapeutic, prophylactic, or diagnostic substances except as a license is obtained for such combination.

§ 22.75 *Container and closure.* Glass used in the container of a licensed product intended for administration by injection shall be colorless and fully transparent. The quality of the glass and of the closure used shall be such as will not hasten the deterioration of the licensed product or render it less suitable for the use intended within the dating period.

§ 22.76 *Standard units or samples.* Standard units or samples for comparison made available by the Institute shall be applied in testing for potency all forms of diphtheria antitoxin, tetanus antitoxin, botulism antitoxin Type A, botulism antitoxin Type B, perfringens antitoxin, scarlet fever streptococcus antitoxin, vibron septique antitoxin, anti-pneumococcal serum (Types I, II, V, VII, and VIII), dysentery antitoxin (Shiga), staphylococcus antitoxin, histolyticus antitoxin, oedematis antitoxin, and sordelli antitoxin and other products for which such units are available.

§ 22.77 *Standards of potency; particular products.* Diphtheria antitoxin shall have a potency of not less than 500 units per milliliter. Tetanus antitoxin shall have a potency of not less than 400 units per milliliter. Scarlet fever streptococcus antitoxin shall have a potency of not less than 400 units per milliliter. Antitoxins dispensed in the dried state shall represent liquid antitoxins of not less than these potencies.

§ 22.78 *Dating period; date of manufacture.* The dating period shall be determined with reference to the date of manufacture which shall be:

(a) For products for which an official standard of potency exists or which are subject to official potency tests, the last date of satisfactorily passing a potency test;

(b) For products for which no official standard of potency exists or which are not subject to official potency tests,

(1) The date of removal from the animal in case of animal products;

(2) The date of extraction in the case of products used for specific desensitization;

(3) The date of solution in case of venoms, and

(4) The date of cessation of growth in case of other products;

(c) For products which are submitted to the Institute for approval prior to release, the date of official release notice.

§ 22.79 *Dating period; products in cold storage.* The dating period may be determined with reference to the period of issue from cold storage, *Provided*, That, except as may be otherwise pre-

scribed for individual products, the date of such issue is not more than six months after the date of manufacture and the product is kept constantly at a temperature not exceeding 10° C., or not more than 1 year after the date of manufacture if the product is kept constantly at a temperature not exceeding 5° C., or not more than 2 years if the product is kept constantly at a temperature not exceeding 0° C.

ADDITIONAL STANDARDS: TRIVALENT ORGANIC ARSENICALS

§ 22.90 *Tests prior to release.* Tests required to be made, prior to the release of each lot of a licensed product, shall be supplemented in the case of the trivalent organic arsenicals by tests for:

- (a) Stability,
- (b) Solubility,
- (c) Arsenic content,
- (d) Moisture,
- (e) Relative non-toxicity.

§ 22.91 *Pre-testing by Institute; samples of each lot.* Prior to the release of any lot of the product, the manufacturer shall forward to the Institute no less than 15 ampoules of the largest single-dose size in such lot, together with protocols showing the results of each test required prior to release.

§ 22.92 *Expiration date.* Notification from the Institute that lot samples forwarded in accordance with § 22.91 have satisfactorily passed prescribed tests shall indicate a date which may be taken as the date of manufacture for the purpose of fixing the expiration date. The date of issue shall be the same as the date of manufacture.

§ 22.93 *Composition of product.* Solutions or solutions of mixtures in the concentrations recommended for clinical administration shall be of such hydrogen ion value and tonicity as to be physiologically compatible with human blood.

§ 22.94 *Container.* The product shall be hermetically sealed under vacuum or under a dry non-oxidizing gas in ampoules prepared from glass of the quality prescribed in § 22.75.

Know all men by these presents, That the Director, Bureau of Land Management, under and by virtue of the act of Congress entitled, "An act to promote the mining of coal, phosphate, oil, oil shale, gas, and sodium on the public domain," approved February 25, 1920 (41 Stat. 437, 30 U. S. C. sec. 181), has granted and does hereby grant a permit to.....

of the exclusive right for a period of two years from the date hereof to prospect for coal on the following described lands.....

but for no other purpose, under the provisions of said act and upon the following express conditions, to-wit:.....

1. To begin prospecting work within 90 days from date hereof and to diligently prosecute the same during the period of such permit in accordance with the following plan:

2. To remove from said premises only such coal or other material as may be necessary to prospecting work, and to keep a record of all coal mined and disposed of, payment of royalty thereon of 25 cents per ton of 2,000 pounds to be made to the Manager of the district land office not later than during the calendar month succeeding that during which such coal was disposed of.

3. To afford all facilities for inspection of the prospecting work on behalf of the Secretary of the Interior, and to make a report on demand of all matters pertaining to the character, progress, and results of such work.

4. To observe such conditions as to the use and occupancy of the surface of the lands as provided by law, in case any of said lands shall have been or may be entered or patented with a reservation of the coal deposits to the United States.

5. To abide by and conform to any and all reasonable regulations of the Secretary of the Interior now or hereafter in force, all of which regulations are made a part and condition of this permit: *Provided*, That such regulations are not inconsistent with any express and specific provisions hereof.

6. That the permittee shall not assign this permit or any interest therein, whether by direct assignment, operating agreement, working or royalty interest, or otherwise, except with the consent in writing of the Director, Bureau of Land Management. All such assignments must be submitted, in triplicate, within 90 days from date of execution and must contain all of the terms and conditions agreed upon by the parties thereto. If the true consideration is not stated in the instrument, an accompanying affidavit must be submitted stating the consideration in full.

7. To conduct operations under this permit in such a way as not to interfere with the administration and use of the lands to a greater extent than may be determined by the Secretary of the Interior to be necessary for the most beneficial use of the lands in case any of the lands described herein are embraced in a forest, reclamation, power, or other withdrawal or is segregated for any particular purpose.

8. That the permittee shall not discriminate against any employee or applicant for employment because of race, creed, color, or national origin, and shall require an identical provision to be included in all sub-contracts.

9. That there is reserved to the United States (1) pursuant to the provisions of the

Act of August 1, 1946 (60 Stat. 755), all uranium, thorium, or any other materials which are or may be determined to be peculiarly essential to the production of fissionable materials, whether or not of commercial value, together with the right of the United States through its authorized agents or representatives at any time to enter upon the lands and prospect for, mine, and remove the same; (2) the right to permit for joint or several use such easements or rights of way upon, through, or in the lands embraced herein as may be necessary or appropriate to the working of the same, or of other lands containing the deposits described in the act of February 25, 1920, *supra*, and the treatment and shipment of the products thereof by or under authority of the Government, its lessees, or permittees, and for other public purposes; (3) the right to lease, sell, or otherwise dispose of the surface of said lands under existing law or laws hereafter enacted in so far as said surface is not necessary for the use of the permittee in prospecting hereunder, and (4) the right and authority to cancel this instrument for failure of the permittee to comply with any of the conditions hereof, after 30 days' notice of the reasons for such cancellation.

The granting of this permit will not preclude the issuance of other permits or leases of the same lands for the mining of other minerals with suitable stipulations as to joint operation, in order that the full development of the mineral resources may be obtained.

Valid existing rights acquired prior hereto on the lands described herein will not be adversely affected hereby.

An application for extension of this permit should be filed only within the period beginning 90 days prior to the date to which the permit is limited and ending 30 days after that date. An application for a preference right lease should be filed promptly after discovery of coal within the permit area in commercial quantities, but in no event later than 30 days after the period for which the permit is limited; a showing as to such discovery, however, must be made prior to the expiration of the period to which the permit is limited.

Dated: _____

Director, Bureau of Land Management.

§ 193.23 Reward for discovery. A permittee who shows that the land included in his permit contains coal in commercial quantities, is entitled to a lease for all or part of the permit lands, the area to be taken in compact form, upon due application and publication of notice thereof. Such showing shall be made within the period of his permit; and the application for lease should be filed in the district land office having jurisdiction over the lands involved promptly after discovery, but in no event later than 30 days after the period for which the permit is limited. If the lands are in a State in which there is no district land office, the application should be filed in the Bureau of Land Management. It should describe the lands desired and set forth fully and in detail the extent and mode of occurrence of the coal deposits as disclosed by the prospecting work performed under the permit. Such leases will be granted without competitive bidding, at such rental and royalty rates as may be fixed by the Secretary of the Interior.

§ 193.25 Extension of permits. By the act approved March 9, 1925 (45 Stat. 251, 30 U. S. C. 201a, 201b), the Secretary of the Interior may extend any coal prospecting permit issued under section

2 of the act of February 25, 1920 (41 Stat. 432, 30 U. S. C. 201) for a period of 2 years.

A permit may be extended if the permittee has been unable with the exercise of reasonable diligence to determine the existence or workability of the coal deposits, or for other reasons which may warrant an extension. An application for extension may be filed only within the period beginning 90 days prior to the date to which the permit is limited and ending 30 days after that date. The application should be filed in the district land office having jurisdiction over the lands involved. If the lands are in a State in which there is no district land office, the application should be filed in the Bureau of Land Management. It should show what efforts, if any, the permittee has made to comply with the terms of his permit and the reasons for failure fully to comply therewith, such showing to be corroborated, if possible, by an affidavit of at least one disinterested person having actual knowledge of the facts. The application should also show how much additional time is considered necessary to complete prospecting work. Extension will be limited to such period, not exceeding the 2 years authorized, as may be determined to be allowable under the circumstances in each particular case. Upon failure to file application within the specified period, the permit will be canceled.

As the permit bond is limited to the period for which the permit was granted, the permittee must file with an application for extension a properly executed assent by the surety or sureties on the bond to the extension of the bond to cover the life of the permit, if extended, or file a new bond.

Until the cancellation or termination of a coal permit is noted on the records of the district land office or on the records of the Bureau of Land Management if the lands involved are in a State in which there is no district land office, no other person will be permitted to gain any right to the same class of deposits by the filing of an application therefor.

2. Section 193.26 Expiration of coal prospecting permits is revoked.

(Sec. 32, 41 Stat. 450; 30 U. S. C. 189)

FRED W. JOHNSON,
Acting Director.

APPROVED: JANUARY 14, 1947.

Assistant Secretary
of the Interior.

The Commission has before it a peti-
 tion for reconsideration filed May 29,
 1946, by L. B. Wilson, Inc., licensee of
 radio station WCKY, Cincinnati, Ohio,
 directed against the action of the Com-
 mission on May 10, 1946, granting with-
 out hearing the above-entitled applica-
 tion of Patrick Joseph Stanton, for a
 construction permit to erect a new stand-
 ard broadcast station to operate on the
 frequency 1530 kilocycles, with 10 kilo-
 watts power, daytime only (Class II).
 Station WCKY operates on the frequency
 1530 kilocycles, with 50 kilowatts power,
 unlimited time, at Cincinnati, Ohio, and
 is classified as a Class I-B clear channel
 station.

The petitioner alleges, as the basis of
 its petition, that station WCKY, a Class
 I-B clear channel station, is entitled to
 protection from objectionable interfer-
 ence of its primary service area up to
 the 0.5 mv/m daytime contour; that the
 proposed station will emit a skywave
 which will interfere with station WCKY's
 primary service area for approximately
 two hours after sunrise and approxi-
 mately one hour before sunset at Phila-
 delphia; and that station WCKY will
 receive limitations to its service rang-
 ing from approximately 0.7 mv/m to 5
 mv/m at the time of sunset in Phila-
 delphia. An answer to the petition,
 filed by Stanton, maintains that the
 interference alleged by the petitioner
 is not "objectionable interference"
 within the meaning of the term as used
 in the Commission's rules and standards.

Under the Commission's rules and reg-
 ulations and the Standards of Good En-

NOTICES

gineering Practice Concerning Standard Broadcast Stations, the primary service area of a Class I-B clear channel station daytime is entitled to protection from objectionable interference up to its 0.1 mv/m contour (See Standards, page 2). The Commission has also recognized that conditions of radio wave propagation permit operation on such clear channels by stations denominated as Class II, under conditions which do not allow objectionable interference (i. e. within the protected contours established for day and night primary service) with the so-called "dominant" clear channel station. The grant to Joseph Patrick Stanton, of which petitioner complains, is of a construction permit to operate daytime only as a Class II station. By definition under the Commission's rules (See §§ 3.6 and 3.23 (c)) the term "daytime" means that period of time between the hours of average monthly local sunrise and average monthly local sunset.

Petitioner's complaint is that the operation of the proposed Stanton station at Philadelphia will result in skywave interference¹ to Station WCKY, Cincinnati, Ohio, during a period following sunrise and preceding sunset. The Commission's rules relating to protection of daytime contours of Class I-B stations do not take cognizance of nor afford protection against skywave interference for the reason that such waves are not reflected effectively back to earth during the day. The skywave curves which are a part of the Commission's standards are based upon extensive measurements of skywave signals produced by broadcasting stations under varying conditions and at various seasons of the year. In 1935, at the time these measurements were taken and other scientific studies made, they indicated that such skywave signals as there were, were of very low order, and hence were considered of so little importance that the standards of the Commission took no cognizance of daytime skywave propagation at broadcast frequencies. The periods of diurnal change are, however, very uncertain and erratic in their effect on radio wave propagation. On some days in the periods immediately before and after sunrise and sunset, skywaves may be reflected into areas which on other days, in the same periods of time, receive no such signal. In this state of the radio art, therefore, it is virtually impossible and the Commission believes it would be unreasonable to define "daytime" operation in terms as unstable, erratic and uncertain as the conditions of radio wave propagation at sunrise and sunset.

Accordingly, the Commission is of the opinion that the grant to Patrick Joseph Stanton, Philadelphia, Pennsylvania, does not result in interference to petitioner's station WCKY, Cincinnati, Ohio, as defined by the Commission's rules and standards, and hence *It is ordered*, This

14th day of November 1946, that the said petition of L. B. Wilson, Inc. (WCKY), Cincinnati, Ohio, for reconsideration be, and it is hereby, denied.

COORDINATION OF ELECTRIC FACILITIES IN THE CONSERVATION OF COAL

ORDER TERMINATING EMERGENCY AND REVOKING EXEMPTIONS

JANUARY 10, 1947.

It appears to the Commission that:
